

The Blair Homes Process

Our Unique Process Helps Make Your Dream A Reality

Every Blair home starts with the choicest locations. Our engineers design each subdivision to maximize your living space, and our real estate agents and attorneys will help you get the lot you want with personalized purchase and sales agreements

Blair Homes are custom built, through and through. Our architects will work with your existing plans or create unique designs to meet all your specific needs. Every Blair home is constructed with quality materials and time-tested techniques.

We work with the existing environment to maximize the natural beauty of your lot.

Blair Team members perform quality checks throughout the construction process, ensuring that everything is up to code and, more importantly, up to the Blair standard.

Unique kitchens, inviting baths, custom master suites, and custom masonry are all specialties for the Blair team. You'll have a chance to leaf through our portfolio before finalizing your plans, but don't be surprised when you find yourself asking for that wine cellar you secretly want.

Blair controls cost and consistency by taking a major roll in every aspect of the neighborhood building process. Let our experience and expertise work for you to deliver the home of your dreams.

Blair specialists walk you through your new home before you move in to make sure every detail is as it should be.

Blair Homes 87 Main Street Rutland, MA 01543 508-886-2275
